LAB REPORT
on

Artificial Intelligence

Submitted by

DHANUSH H V (1BM21CS052)

in partial fulfillment for the award of the degree of
BACHELOR OF ENGINEERING
in
COMPUTER SCIENCE AND ENGINEERING

B.M.S. COLLEGE OF ENGINEERING
(Autonomous Institution under VTU)
BENGALURU-560019
Nov-2023 to Feb-2024

B. M. S. College of Engineering,

Bull Temple Road, Bangalore 560019

(Affiliated To Visvesvaraya Technological University, Belgaum)

Department of Computer Science and Engineering

CERTIFICATE

This is to certify that the Lab work entitled "**Artificial Intelligence**" carried out by **DHANUSH H V (1BM21CS052),** who is bonafide student of **B.M.S. College of Engineering.** It is in partial fulfillment for the award of **Bachelor of Engineering in Computer Science and Engineering** of the Visvesvaraya Technological University, Belgaum during the academic semester June-2023 to Sep-2023. The Lab report has been approved as it satisfiesthe academic requirements in respect of a **Artificial Intelligence (22CS5PCAIN)** work prescribed for the said degree.

Saritha A N	**Dr. Jyothi S Nayak**
Assistant Professor	Professor and Head
Department of CSE	Department of CSE
BMSCE, Bengaluru	BMSCE, Bengaluru

Index Sheet

Lab Program No.	Program Details
1	Implement Tic –Tac –Toe Game.
2	Solve 8 puzzle problems.
3	Implement Iterative deepening search algorithm.
4	Implement A* search algorithm.
5	Implement vaccum cleaner agent.
6	Create a knowledge base using prepositional logic and show that the given query entails the knowledge base or not.
7	Create a knowledge base using prepositional logic and prove the given query using resolution
8	Implement unification in first order logic
9	Convert a given first order logic statement into Conjunctive Normal Form (CNF).
10	Create a knowledge base consisting of first order logic statements and prove the given query using forward reasoning.

Course Outcome

CO1	Apply knowledge of agent architecture,searching and reasoning techniques for different applications.
CO2	Analyse Searching and Inferencing Techniques.
CO3	Design a reasoning system for a given requirement.
CO4	Conduct practical experiments for demonstrating agents, searching and inferencing.

1. Implement Tic –Tac –Toe Game.
